9/23/08 - Medical Intelligence announces that Tunstall Healthcare begins commercial pilot program for Vega GPS Bracelet

Attention Business Editors

QUEBEC CITY, QC, Sept. 23 /CNW/ - Medical Intelligence Technologies Inc. (TSX-V: MIZ), a provider of innovative monitoring solutions for the mobile telecare industry, today announced that Tunstall Healthcare, the leading provider of telecare and telehealth solutions with over 2.5 million customers in 30 countries, is working with customers in the UK market to pilot Medical Intelligence's Vega GPS Bracelet, a solution which has been designed to offer high quality care and support for people with Alzheimer's, giving users greater independence and the freedom to walk about in a safe environment, while offering valuable peace of mind to families and carers.

"We are delighted that Tunstall Healthcare has the confidence to put the Vega in the hands of customers for the first time in these live customer trials," said Philippe P. Huneault, President and CEO of Medical Intelligence. "The evaluation process done by Tunstall has made our offering even stronger and we look forward to the product becoming commercially available in the UK market in the near future."

Medical Intelligence has been working closely with Tunstall to enhance services and train staff to meet Tunstall's needs. An evaluation process and exhaustive testing phase was completed by a number of Tunstall employees operating daily as Vega users. Each user simulated the behavior associated with Alzheimer's and other cognitive disorders to test the Vega's features.

Tunstall Healthcare highlighted the Vega trial in a press release announcing the launch of www.alzheimers-support.com, a new website that provides information, advice and support to people with Alzheimer's, their families and carers across the world.

About Medical Intelligence Technologies Inc.

Medical Intelligence is an early innovator in the mobile telecare industry, providing solutions that integrate information and telecommunications technologies. The Company designs portable GPS monitoring and locating devices that assist individuals with health or safety concerns. Based in Quebec City, the Company also has subsidiaries in France, Spain and the United Kingdom (Medical Mobile) where it commercializes its four solutions; the Columba GPS Bracelet; the Vega GPS Bracelet; the PERSmobile GPS Emergency System, and Urgentys GPS Lone Worker.
