Medical Intelligence signs license agreement in the U.K. with BD-1 for Urgentys Lone-Worker

Québec City, Quebec, November 24, 2008 — Medical Intelligence Technologies Inc. ([TSX-V: MIZ](#)), a pioneer in the mobile telesecurity industry, today announced that it has signed a commercialisation licence agreement with BD-1 to supply Urgentys Lone Worker GPS Bracelets into the UK security market. BD-1, a specialist telecom company and a major partner of Orange UK, is part of the SIXIS Group, and has been investing heavily in creating a lone worker and risk management service to the rapidly expanding UK market.

As part of the BD-1 service, the Urgentys solution will be integrated into the Sentinel alarm receiving and monitoring software that handles over 50% of the UK alarm monitoring market through over 50 established alarm receiving centres. BD-1 and Medical Intelligence are working together to provide a service that will meet the needs of both the security market and their customers.

“We are delighted to announce this important relationship with BD-1”, says Mr. Philippe P. Huneault, President and CEO of Medical Intelligence Technologies. “BD-1 are part of a dynamic group that has a track record of delivering successful solutions to a wide range of markets. The opportunity for Urgentys as an integrated part of a wider security solution is clear and we believe BD1 are the ideal partner to work with in this market”

Andy Barracliffe, Director, BD-1 Services commented: “Medical Intelligence Technologies Inc. is renowned for being highly innovative and progressive and we are delighted to have the opportunity of working in partnership with them.

“We are already heavily involved in delivering solutions to protect lone workers and the Urgentys solution not only further enhances our offering but reinforces our position as being a major force within the fast expanding lone worker/risk management marketplace.”

About SIXIS Group
